

## TESTIMONIAL

**There are very few products that I have been enthusiastic about as my Mastecare.**

I have had a lifetime of lower back pain. I have gone through the gamut of chiropractic treatments, physical therapy, followed by a few operations. I Could manage only temporary relief at best. It seems that my back would constantly fall out of alignment even though I realign it each day through a strenuous exercise program.

I was delighted from the very first with MASTERcare's inversion machine. It held true to the concept of using one's own weight in a gravity free environment to accomplish a quick realignment of the spine.
