Dear Mastercare – Swedish Back care system

We have used your inversion table equipment for over two years now. It has proved to be safe, easy to use and convenient for patients. We use it in a general therapy area where we are working on 5 to 7 people at the same time. Patients like using the table. On occasion we will do spinal adjustments in the supine or prone position while inverted on the table. It is a quality piece of equipment.

Thank-you

Respectfully,

Dr. Avery N. Martin
