

13. Sept .2006

Shalom and Hello.

Enclosed is my recommendation for your wonderful Mastercare Inversion Table.

Last Saturday I promised , through the phone, to one person in your office to write it,

And here it is!!!!!!!!!!!!!!

[I am sorry; I do not know the name of this nice gentleman.]

I give you a permission to use my recommendation where ever or when ever you wish to.

Shulamit Koren...

#### A Recommendation

I highly recommend using the Mastercare Inversion Table.

I was introduced to it 6 years ago, when I , as a physiotherapist, was invited to a professional demonstration .

I knew immediately that this is the thing I was looking for years.

I think that as a physiotherapist I have to teach people how to take care of themselves.

I prefer to give people fishing poles rather than fish.

With the Mastercare, everybody can live for ever with no back pains.

I bought one Mastercare Inversion Table for myself , for home use.

I have a severe Scoliosis and a severe risk for Osteoporosis.

The daily traction that I have by using the bed, prevent any back pains in spite the very hard physical work that I am doing daily

In addition,

As a physiotherapist I made a study of the ways how to prevent, or, how to slow Osteoporosis.

Traction and rotation with traction on the spines are recommended.

While exercising on the bed I make rotation and other exercises.

I have a wonderful feeling when I use the Mastercare, and I often recommend of using it to my patients

Grateful yours

Shulamit Koren. - Israel
