Hello Magnus

Below is an extract of a recommendation i got today from a Physiotherapist who treated patients using the demonstration sample you sent me.

This was at the kenya medical Training College treatment Unit-physiotherapy department:

**The Chief Physiotherapist,  
Ministry of Medical Services,  
P. O. Box 30016-0100  
Nairobi- Kenya.**

Dear Sir,

**RE: MASTER CARE TRACTION UNIT.**

This is to confirm that I used the above equipment while at the Kenya Medical Training College and found it to be very effective in management of spinal conditions. It uses very simple logic of body weight to offer very effective traction and relieve symptoms within a short time. For instance I had a 33 year old lady with chronic Lumbago and stiffness of the spine and I had been treating her for over one year after she had been referred to me by a colleague. After a few sessions on Mastercare she recovered and she is fine to date. I would recommend this equipment as it is not electrical, simple to use and can even be used as a tilt board for the spinal injury patients as the angle of inclination is adjustable.

Yours Faithfully

Patrick Madahana Ngusale  
Physiotherapist-National Spinal Injury Hospital
