

## Success for the Mastercare Back-A-Traction Mini!

The **Mastercare Mini**™ was tested under rough circumstances in the desert at the Dakar Rally 2007 by the French driver Frédéric (Fred) Lépan.

Fred Lepan used the table every day before and after each stage. Since the Dakar Rally causes big stress to the body it normally takes a while for him to recover, but after using the **Mastercare Mini** table he was quickly in shape again.

*"Many other drivers, intrigued by the capabilities of our table after our working session and were even more impressed after having tried the **Mastercare Mini** table themselves."  
- Gerard Grouard, Kinesitherapist and Osteopath, France*
